

Smart Contract Security Audit

Audit details:

Audited project: YumYumFarm

Deployer address: 0x680c608737a8ab7854dc7db5d9cb5211ca0a805e

Client contacts: YumYumFarm team

Blockchain: Binance Smart Chain

Project website: https://yumyumfarm.io

May, 2021 TechRate

Disclaimer

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the below disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and TechRate and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (TechRate) owe no duty of care towards you or any other person, nor does TechRate make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and TechRate hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, TechRate hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against TechRate, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

Background

TechRate was commissioned by YumYumFarm to perform an audit of smart contracts:

• https://bscscan.com/address/0xd0939CA16CC60e7088A25Fd7CaEcE84c59d FEB92#code

The purpose of the audit was to achieve the following:

- Ensure that the smart contract functions as intended.
- Identify potential security issues with the smart contract.

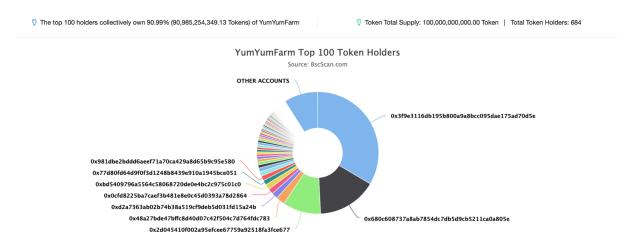

The information in this report should be used to understand the risk exposure of the smart contract, and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

Contracts details

Token contract details for 03.05.2021.

Contract name:	YumYumFarm
Contract address:	0xd0939CA16CC60e7088A25Fd7CaEcE84c59dFEB9 2
Total supply:	100_000_000_000_000_000
Token ticker:	YUM
Decimals:	9
Token holders:	684
Transactions count:	1599
Top 100 holders dominance:	90.99 %
Liquidity fee:	5
Tax fee:	5
Total fees:	4_661_786_612_251_390_673
Uniswap V2 pair:	0x3f9e3116db195b800a9a8bcc095dae175ad70d5e
Contract deployer address:	0x680c608737a8ab7854dc7db5d9cb5211ca0a805e
Contract's current owner address:	0x680c608737a8ab7854dc7db5d9cb5211ca0a805e

YumYumFarm token distribution

(A total of 90,985,254,349.13 tokens held by the top 100 accounts from the total supply of 100,000,000,000.00 token)

YumYumFarm contract interaction details

Issues Checking Status

Nº	Issue description.	Checking status		
1	Compiler errors.	Passed		
2	Race conditions and Reentrancy. Cross-function race conditions.	Passed		
3	Possible delays in data delivery.	Passed		
4	Oracle calls.	Passed		
5	Front running.	Passed		
6	Timestamp dependence.	Passed		
7	Integer Overflow and Underflow.	Passed		
8	DoS with Revert.	Passed		
9	DoS with block gas limit.	Low issues		
10	Methods execution permissions.	Passed		
11	Economy model of the contract.	Passed		
12	The impact of the exchange rate on the logic.	Passed		
13	Private user data leaks.	Passed		
14	Malicious Event log.	Passed		
15	Scoping and Declarations.	Passed		
16	Uninitialized storage pointers.	Passed		
17	Arithmetic accuracy.	Passed		
18	Design Logic.	Passed		
19	Cross-function race conditions.	Passed		
20	Safe Open Zeppelin contracts implementation and usage.	Passed		
21	Fallback function security.	Passed		

Security Issues

High Severity Issues

No high severity issues found.

Medium Severity Issues

No medium severity issues found.

Low Severity Issues

1. Out of gas

Issue:

☐ The function includeInReward() uses the loop to find and remove addresses from the _excluded list. Function will be aborted with OUT_OF_GAS exception if there will be a long excluded addresses list.

```
function includeInReward(address account 1) external onlyOwner() {
    require( isExcluded[account 1], "Account is already excluded");
    for (uint256 i = 0; i < excluded.length; i++) {
        if (excluded[i] == account 1) {
            excluded[i] = excluded.length - 1];
            tOwned[account 1] = 0;
            isExcluded[account 1] = false;
            excluded.pop();
            break;
        }
    }
}</pre>
```

☐ The function _getCurrentSupply also uses the loop for evaluating total supply. It also could be aborted with OUT_OF_GAS exception if there will be a long excluded addresses list.

Recommendation:

Use EnumerableSet instead of array or do not use long arrays.

Owner privileges

	O wner	can	change	the	tax	and	liquidity	fee.
--	---------------	-----	--------	-----	-----	-----	-----------	------

- **□** Owner can change the maximum transaction amount.
- Owner can exclude from the fee.

Conclusion

Smart contracts do not contain any high severity issues, but there are some low severity issues and owner privileges! Liquidity pair contract is not checked.

DXSale locking details provided by the team.
