

# **Smart Contract Security Audit**

### **Audit details:**

Audited project: Space Sharks

Deployer address: 0xd789ba6495a51b1fa80d8653e95aacf8bdd6b5ea

Client contacts: Space Sharks team

Blockchain: Binance Smart Chain

Project website: <a href="https://spacesharks.co">https://spacesharks.co</a>

April, 2021 TechRate

## **Disclaimer**

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the below disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and TechRate and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (TechRate) owe no duty of care towards you or any other person, nor does TechRate make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and TechRate hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, TechRate hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against TechRate, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

# **Background**

TechRate was commissioned by Space Sharks to perform an audit of smart contracts:

• <a href="https://bscscan.com/address/0xbdfb7a9e5a74cd722a9691570108caaacb176">https://bscscan.com/address/0xbdfb7a9e5a74cd722a9691570108caaacb176</a>
74a#code

The purpose of the audit was to achieve the following:

- Ensure that the smart contract functions as intended.
- Identify potential security issues with the smart contract.

The information in this report should be used to understand the risk exposure of the smart contract, and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

# **Contracts details**

## Token contract details for 20.04.2021.

Contract name:	Space Sharks
Contract address:	0xbdfb7a9e5a74cd722a9691570108caaacb17674a
Total supply:	1_000_000_000_000_000_000_000
Token ticker:	SPACESHARKS
Decimals:	9
Token holders:	706
Transactions count:	1802
Top 100 holders dominance:	99.62 %
Liquidity fee:	5
Tax fee:	2
Total fees:	2_146_470_784_285_459_811_534
Uniswap V2 pair:	0x9565b50e894239b3d2675f4806d68ac6958c070d
Contract deployer address:	0xd789ba6495a51b1fa80d8653e95aacf8bdd6b5ea
Contract's current owner address:	0xd789ba6495a51b1fa80d8653e95aacf8bdd6b5ea

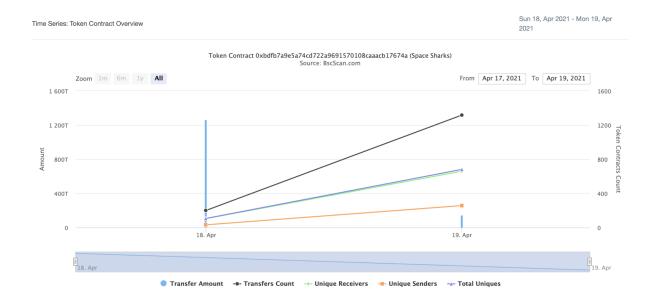

## Space Sharks token distribution

0xd789ba6495a51b1fa80d8653e95aacf8bdd6b5ea

(A total of 996,233,327,941,440.00 tokens held by the top 100 accounts from the total supply of 1,000,000,000,000,000.00 token)

## Space Sharks contract interaction details

# **Space Sharks top 10 token holders**

Rank	Address	Quantity (Token)	Percentage
1	0xd789ba6495a51b1fa80d8653e95aacf8bdd6b5ea	707,973,724,670,073.183032172	70.7974%

# **Issues Checking Status**

Nº	Issue description.	Checking status
1	Compiler errors.	Passed
2	Race conditions and Reentrancy. Cross-function race conditions.	Passed
3	Possible delays in data delivery.	Passed
4	Oracle calls.	Passed
5	Front running.	Passed
6	Timestamp dependence.	Passed
7	Integer Overflow and Underflow.	Passed
8	DoS with Revert.	Passed
9	DoS with block gas limit.	Low issues
10	Methods execution permissions.	Passed
11	Economy model of the contract.	Passed
12	The impact of the exchange rate on the logic.	Passed
13	Private user data leaks.	Passed
14	Malicious Event log.	Passed
15	Scoping and Declarations.	Passed
16	Uninitialized storage pointers.	Passed
17	Arithmetic accuracy.	Passed
18	Design Logic.	Passed
19	Cross-function race conditions.	Passed
20	Safe Open Zeppelin contracts implementation and usage.	Passed
21	Fallback function security.	Passed

# **Security Issues**

## **High Severity Issues**

No high severity issues found.

## **Medium Severity Issues**

No medium severity issues found.

## Low Severity Issues

#### 1. Out of gas

Issue:

☐ The function includeInReward() uses the loop to find and remove addresses from the \_excluded list. Function will be aborted with OUT\_OF\_GAS exception if there will be a long excluded addresses list.

☐ The function \_getCurrentSupply also uses the loop for evaluating total supply. It also could be aborted with OUT\_OF\_GAS exception if there will be a long excluded addresses list.

```
function _getCurrentSupply() private view returns(uint256, uint256) {
    uint256 rSupply = _rTotal;
    uint256 tSupply = _tTotal;
    for (uint256 i = 0; i < _excluded.length; i++) {
        if (_rOwned[_excluded[i]] > rSupply || _tOwned[_excluded[i]] > tSupply) return (_rTotal, _tTotal);
        rSupply = rSupply.sub(_rOwned[_excluded[i]]);
        tSupply = tSupply.sub(_tOwned[_excluded[i]]);
    }
    if (rSupply < _rTotal.div(_tTotal)) return (_rTotal, _tTotal);
    return (rSupply, tSupply);
}</pre>
```

#### Recommendation:

Use EnumerableSet instead of array or do not use long arrays.

## Owner privileges

Owner can change the tax and liquidity fee.
Owner can change the maximum transaction amount.
Owner can exclude from the fee.

## Conclusion

Smart contracts contain only low severity issues and owner privileges.

#### Techrate note:

Please check the disclaimer above and note, the audit makes no statements or warranties on business model, investment attractiveness or code sustainability. The report is provided for the only contract mentioned in the report and does not include any other potential contracts deployed by Owner.
