

Smart Contract Security Audit

Audit details:

Audited project: Sauron

Deployer address: 0xcb91472f6803e7b8afa2c9e5b7bb6d5c436d896d

Client contacts: Sauron team

Blockchain: Binance Smart Chain

Project website: Not provided

May, 2021 TechRate

Disclaimer

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the below disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and TechRate and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (TechRate) owe no duty of care towards you or any other person, nor does TechRate make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and TechRate hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, TechRate hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against TechRate, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

Background

TechRate was commissioned by Sauron to perform an audit of smart contracts:

• <u>https://bscscan.com/address/0x0ab172176dd5f2ffcea55003967a90c1545de4</u> 81#code

The purpose of the audit was to achieve the following:

- Ensure that the smart contract functions as intended.
- Identify potential security issues with the smart contract.

The information in this report should be used to understand the risk exposure of the smart contract, and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

Contracts details

Token contract details for 01.05.2021.

Contract name:	Sauron
Contract address:	0x0ab172176dd5f2ffcea55003967a90c1545de481
Total supply:	1_000_000_000_000_000_000_000
Token ticker:	SRNX
Decimals:	9
Token holders:	480
Transactions count:	2062
Top 100 holders dominance:	92.23 %
Liquidity fee:	3
Tax fee:	3
Total fees:	56_676_293_564_071_767_433_165
Uniswap V2 pair:	0x38a30211117c090635d7cecaa91a63a4dc965f2f
Contract deployer address:	0xcb91472f6803e7b8afa2c9e5b7bb6d5c436d896d
Contract's current owner address:	0xcb91472f6803e7b8afa2c9e5b7bb6d5c436d896d

Sauron token distribution

(A total of 922,271,430,595,393.00 tokens held by the top 100 accounts from the total supply of 1,000,000,000,000,000,000 token)

Sauron contract interaction details

Issues Checking Status

Nº	Issue description.	Checking status			
1	Compiler errors.	Passed			
2	Race conditions and Reentrancy. Cross-function race conditions.	Passed			
3	Possible delays in data delivery.	Passed			
4	Oracle calls.	Passed			
5	Front running.	Passed			
6	Timestamp dependence.	Passed			
7	Integer Overflow and Underflow.	Passed			
8	DoS with Revert. Passed				
9	DoS with block gas limit.	Low issues			
10	Methods execution permissions.	Passed			
11	Economy model of the contract.	Passed			
12	The impact of the exchange rate on the logic.	Passed			
13	Private user data leaks.	Passed			
14	Malicious Event log.	Passed			
15	Scoping and Declarations.	Passed			
16	Uninitialized storage pointers.	Passed			
17	Arithmetic accuracy.	Passed			
18	Design Logic.	Passed			
19	Cross-function race conditions.	Passed			
20	Safe Open Zeppelin contracts implementation and usage.	Passed			
21	Fallback function security.	Passed			

Security Issues

High Severity Issues

No high severity issues found.

Medium Severity Issues

No medium severity issues found.

Low Severity Issues

1. Out of gas

Issue:

☐ The function includeInReward() uses the loop to find and remove addresses from the _excluded list. Function will be aborted with OUT_OF_GAS exception if there will be a long excluded addresses list.

```
function includeInReward(address account 1) external onlyOwner() {
    require( isExcluded[account 1], "Account is already excluded");
    for (uint256 i = 0; i < excluded.length; i++) {
        if (excluded[i] == account 1) {
            excluded[i] = excluded.length - 1];
            tOwned[account 1] = 0;
            isExcluded[account 1] = false;
            excluded.pop();
            break;
        }
    }
}</pre>
```

☐ The function _getCurrentSupply also uses the loop for evaluating total supply. It also could be aborted with OUT_OF_GAS exception if there will be a long excluded addresses list.

Recommendation:

Use EnumerableSet instead of array or do not use long arrays.

Owner privileges

	O wner	can	change	the	tax	and	liquidity	fee.
--	---------------	-----	--------	-----	-----	-----	-----------	------

- □ Owner can change the maximum transaction amount.
- Owner can exclude from the fee.

Conclusion

Smart contracts contain low severity issues and owner privileges! No liquidity info found on DXSale or Unicrypt, liquidity pair contract is not checked.

Techrate note:

Please check the disclaimer above and note, the audit makes no statements or warranties on business model, investment attractiveness or code sustainability. The report is provided for the only contract mentioned in the report and does not include any other potential contracts deployed by Owner.
